

West Main Realignment Project ^[1]

West Main Before and After Picture Slideshow ^[2]:

The West Main Street Realignment project runs from the west city limits of Kelso at West Cowlitz Way to the west end of the Allen Street Bridge at 1st Street. The genesis of the project was growing traffic, congestion and accidents along the corridor.

The goal of the project is to redevelop the streets in the area to deal with those issues, and at the same time provide a desirable business friendly environment.

For More Information:

We will continue to update this project web site as significant elements of the project are considered and completed, and advise you with an email if you wish. It will continue to provide the Citizens of Kelso the opportunity to watch the development of the project, and an avenue to provide feedback. If you would like to receive notices when updates are posted, and/or significant issues are being addressed, you may send an email using the contact information

below and we will be happy to include you on our email list!

Al King, P.E., Project Manager

City of Kelso / H. W. Lochner
